- **Line 3** => **"will"** is repeated 4 times, because case sensitivity doesn't matter for the word count (the first "Will" becomes "will"); and **"work"** appears only two times, so it is not among the most repeated words.
1. **highest_wf_count** => "Maximum Count of Words"
 2. **highest_wf_words** => an array of "Words With Highest Frequency"
 3. **highest_count_across_lines** => the highest number among "Maximum Count of Words"
 4. **highest_count_words_across_lines** => an array of LineAnalyzer objects that have **highest_wf_count** attribute equal to **highest_count_across_lines** (see the [full explanation](#))
